

MOHAMMAD HOSSEIN ZIAEE

PRODUCT DESIGNER

Tehran, Iran | +98 936 984 0202 | mhziaee@gmail.com | linkedin.com/in/mhziaee | mhziaee.vercel.app

SUMMARY

Product Designer with 7+ years of experience across e-commerce, marketplaces, ed-tech, and B2B SaaS, including 4+ years at Digikala. Experienced in taking complex product problems from discovery and framing through design, experimentation, launch, and measurement, with depth in Search & Discovery, AI-powered experiences, marketplace systems, and conversion optimization.

CORE SKILLS

Product: Product Discovery, End-to-End Product Design, Search & Discovery, AI Products, Marketplace, Conversion Optimization

Research & Data: Product Analytics, Behavioral Data, User Research, Hypothesis Development, Experiment Design, A/B Testing

Design & Collaboration: Interaction Design, Information Architecture, Prototyping, Design Systems, Stakeholder Alignment, Figma

EXPERIENCE

Product Designer | Digikala

2022 - Present

- Led the end-to-end redesign of Search Autocomplete across mobile and desktop, using behavioral and query data to restructure low-value, duplicate, and unmet intents into a scalable multi-intent system; a design-only A/B test increased CTR from 0.42 to 0.53 (+25.7% relative).
- Redesigned Review Submission around a rating-first hypothesis and jointly selected the two-step variant, increasing daily reviews by 24.6%, reviewers by 17.4%, and reviews per user by 6.1% - an estimated ~7,000 additional reviews per day at full rollout.
- Identified AI Review Summary before the formal PRD and owned its product design, partnering with Engineering on Persian output quality, readability, cost, and trust; it delivered a 3% relative lift in PDP-to-Add-to-Cart conversion and scaled to ~167,000 eligible products.
- Proactively identified Seller Page as a weak destination and created the proposal that informed the PRD; aligned Product, Research, Decision, and Commercial teams around a searchable storefront, seller reputation, and constrained personalization. Currently in development.
- Designed the Discovery experience for three-hour delivery across app, mobile web, and desktop, translating precise-address eligibility into recoverable states and aligning three Shopping Squads; ~15% of eligible cart closures were attributed to journeys from the Homepage carousel.
- Designed Pors-o-Joo, a zero-to-one community-commerce product, from architecture to launch in ~2 months; the dashboard later recorded 202,590 engaged users, 60,204 questions, and 173,516 answers.
- Reframed an infeasible merge of Digikala's AI Shopping Assistant and Support Chatbot as a shared identity and entry point with independent systems, delivering the cross-platform experience to full rollout in ~2 weeks.

Product Designer | Lingotalk

Sep 2019 - May 2022

- Owned product design from the language-learning MVP through a major redesign of teacher discovery, profiles, trust information, and booking; teacher-listing-to-first-booking conversion subsequently rose from ~1.5% to ~2% in Google Analytics.

Product Designer | First Eurasia eCommerce

Mar 2018 - May 2019

- Redesigned the B2B e-commerce homepage and lead-generation journey, clarifying the value proposition and simplifying the path from product discovery to sales inquiry; also improved UX and feature design for the company's Payam Gostar CRM product.

EDUCATION

MBA, Information Technology - Islamic Azad University

2019 - 2021

Bachelor's Degree, Applied Computing - Southern Cross University

2009 - 2013

Bachelor's Degree, Business / Managerial Economics - Allameh Tabataba'i University

2005 - 2009
